PROFESSIONAL SUMMARY

Data Engineer with knowledge in big data ingestion, integration and processing (Spark), as well as some pipeline introduction (Airflow). Strong background in Python and SQL, with hands-on experience in ETL workflows, data warehousing, and cloud platforms (AWS, Azure). Proven ability to transform complex, heterogeneous datasets into scalable, production-ready data solutions through iterative development, data quality validation, and performance optimization.

PROFESSIONAL EXPERIENCE

Data & AI Engineer

Capgemini Engineering

Sep. 2025 – present
Vila Nova de Gaia, Portugal

- Developed data pipeline and big-data projects in Spark and Airflow.
- Delivered a complete and data-oriented AWS solution with Terraform.
- Migrated a Mendix production and governance application to Microsoft Power Platform (Power Apps and Automate).

Research Assistant

Centre for Informatics and Systems of the University of Coimbra

Sep. 2023 – Jul. 2024
Coimbra, Portugal

- Innovated with a broad framework for real-world applications of ML implementations.
- Mitigated identified shortcomings of non-ideal multi-agent environments with a human-centered perspective.
- Improved the classical implementations by 10% with less 100 iterations in some cases for the same target accuracy.

EDUCATION

MSc in Data Science and Engineering

Universidade de Coimbra

BSc in Physics Engineering

Universidade de Coimbra

CERTIFICATES

Generative AI Leader

Google Cloud

Azure AI Fundamentals

Microsoft

PROJECTS

Talent Guardian: Preventing Attrition with ETL, DW, and OLAP

MSc in Data Science and Engineering

Sep. 2023 – Jan. 2024
Coimbra, Portugal

- Integrated data from multiple sources with ETL, achieving a throughput higher than 1 with 30+ columns.
- Constructed a Data Warehouse with an orchestration tool and manipulated it with SQL for a ML model and Tableau to perform analysis.
- Built a classification model with probability reaching an accuracy above 80%.

SKILLS

Data Architecture and Orchestration: ETL, Data Warehouse, Airflow, Spark

Cloud Computing: AWS (S3, RDS, VPC, Lambda), Azure, Google Cloud, Microsoft Power Platform

Programming Languages: Python, SQL (Postgres, MySQL), Bash, MATLAB, Java

Tools and Software: Git, pgAdmin, Terraform, Tableau, Dash
